

## **CIP Compliance Analyst, Waterbury, Vermont**

Utility Services, a service provider specializing in North American Electric Reliability Corporation (NERC) compliance, reliability, and security, has opened a position for work in the development of compliance and security programs for use by Bulk Electric System participants. NERC has regulatory authority over Transmission greater than 100kV and generation greater than 20MW. We are looking to fill one full-time position.

§ Develop a fundamental understanding of NERC Critical Infrastructure Protection (CIP) standards for implementation with our customers

§ Monitor and maintain a functional understanding of NERC CIP standards, including the participation in the development of new standards in the industry

§ Gain an understanding of the compliance and regulatory challenges facing electric industry participants.

§ Assist staff with the development of program documentation for Utility Services clients

§ Assist in development of compliance documents and templates for the latest version of the NERC CIP standards

§ Review draft version of CIP standards to revise and improve existing program documentation

§ Review network diagrams and security settings and conduct vulnerability assessments

§ Developing penetration testing program or other types of applicable network security testing

§ Assist in development of scenarios and injects for cyber security table top exercises

§ Participate in the cyber security table top exercises

§ Assist in after action report development of table-top exercises

§ Other tasks as needed.

Utility Services offers competitive compensation and benefits as a part of employment. We are looking for candidates to start immediately. If you are interested in this position, please email your resume to [info@utilitysvcs.com](mailto:info@utilitysvcs.com).
